Who **We** Are

At **Exsion365,** we believe in empowering organizations to make swift, accurate decisions through cutting-edge data analysis.

Our philosophy is straightforward: let the software do the heavy lifting.

With our intuitive solutions, you can say goodbye to tedious tasks like merging reports and compiling data. We've designed our platform to take the hassle out of reporting, so your teams can focus on what truly matters – analyzing data and turning it into actionable insights that drive smarter decisions.

Our powerful tools give you the freedom to achieve more with your reporting, offering the speed, flexibility, and user-friendly interface needed to keep up in today's fast-moving world.

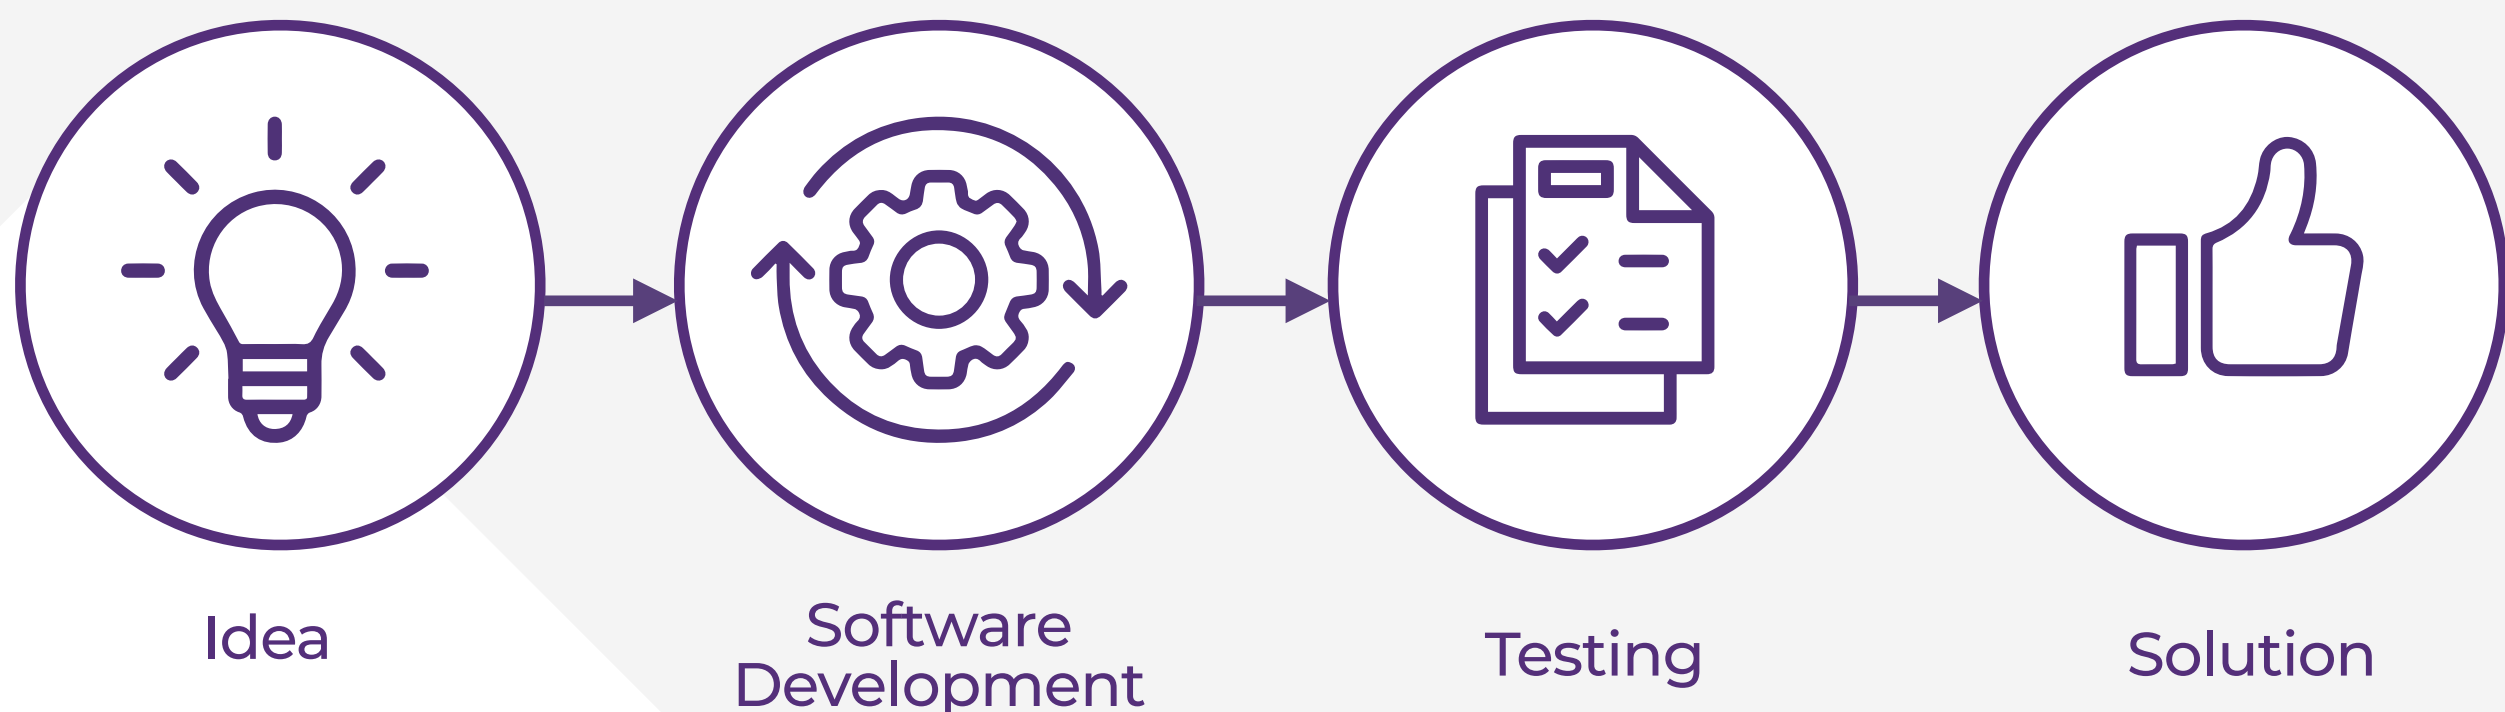

FAST.
SIMPLE.
USER-FRIENDLY.

Innovation
is in our **DNA**

In 1998, a specific client challenge inspired the creation of the first version of **Exsion Reporting.** Originally designed as a custom migration solution, it quickly demonstrated its value and adaptability.

By 2002, **Exsion Reporting** had evolved into a powerful on-premise tool, achieving its first commercial sale. This success paved the way for **Exsion Reporting** to become a trusted and flexible financial reporting solution for companies worldwide, setting the foundation for its continued evolution and success.

Exsion
Reporting

A **software** designed for D365 Business Central

One of the most significant challenges Dynamics 365 Business Central users face is efficiently accessing and managing their data.

Exsion Reporting is purpose-built with **financial** and **business controllers** in mind, offering a direct, seamless connection to Business Central.

With Exsion, you can effortlessly retrieve, organize, and manage your data directly in Excel, streamlining your reporting processes and boosting operational efficiency.

**AT EXSION REPORTING, USER-FRIENDLINESS IS KEY WHEN WE DEVELOP OUR SOLUTIONS**

We have designed Exsion Reporting with a similar structure to Business Central and is fully integrated within Excel. The more you know about these platforms, the easier and more intuitive it will be to master Exsion Reporting.

Exsion Reporting
Fastest way to retrieve your data

Exsion
Reporting

NO MORE DOUBLE RIGHTS MANAGEMENT
Users have the exact same access from business central instantly.

THIS INCLUDES ANY CUSTOMIZED FIELDS, TABLES AND API'S ARE AUTOMATICALLY INCLUDED ON INITIAL INSTALLATION. NO ADDITIONAL SET UP IS NEEDED!

Cost **efficient**

Organizations struggle to ensure that this process remains cost-efficient without compromising on quality.

Implementing a robust reporting tool can often be an extensive process, presenting unpredictable challenges along the way.

Consultancy hours, complex reporting structures, long implementation process

Say **GOODBYE** to complex and lengthy implementation processes.

**WITH EXSION REPORTING, YOU CAN BECOME PROFICIENT IN LESS THAN A DAY!**

Exsion Reporting
Fastest way to retrieve your data

Dynamic download

Our feature **Dynamic download** retrieves all tables and fields available in Business Central.

Dynamic download

With **Dynamic download** you can filter on period, amount, company - basically all filters available in Business Central are included and you can use to determine the outcome of your download.

Exsion
functions

16 STANDARD EXSION FORMULAS ARE AVAILABLE

With seamless integration to Business Central, our formulas deliver a wealth of information instantly. This ensures you have the flexibility and efficiency needed to build ad hoc reports quickly providing instant access to crucial information.

Just like in **Excel**, each function comes with clear parameters and a brief, straightforward explanation of how to apply them. From the moment you download, you'll be up and running with minimal effort, allowing you to start leveraging its power right away.

It's designed for users of all levels – intuitive, familiar, and ready to enhance your productivity.

Exsion Reporting
Fastest way to retrieve your data

In **Practice**

Exsion
functions

With **Exsion,** there's no need to rely on complex Excel formulas that can break or lead to frustrating #REF errors.

Our powerful functions pull data directly from Business Central, similarly to a vlookup, ensuring accuracy and eliminating the risk of manual errors.
See below examples:

The **EXSIONBC_ACCBAL** formula is designed to retrieve account balances based on the parameters you provide. If you don't specify a date, the formula will automatically fetch the balance that matches your real-time data.

Function Arguments

EXSIONBC_ACCBAL

Company	⬆	=
G/L Account No.	⬆	=
[Date filter]	⬆	=
[Budget code]	⬆	=
[Dimension 1]	⬆	=

=

Returns the balance or budget of a G/L account.

Company   Company.

Function Arguments

EXSIONBC_CUSBAL

Company	⬆	=
Customer No.	⬆	=
[Date filter]	⬆	=
[Dimension 1]	⬆	=
[Dimension 2]	⬆	=

=

Returns the outstanding balance of a customer.

Company   Company.

Similar to the above, the **EXSION_CUSBAL** works the same way, bringing the customer outstanding balance.

Customer reviews

★★★★★

Great data and performance!

I was struggling to get my data out of Business Central in Excel. **Exsion Reporting** took care of it and fast!

★★★★★

Nice product!

I previously used the product on NAVISION. Now that we have switched to BC I was curious if Exsion would still work. The installation was done within 5 minutes and with a small adjustment all my reports worked again within a week.

★★★★★

Best Tool for BC365

Quick and Easy access for creating reports directly on Business Central Data.

★★★★★

A real must have!

A real must have when using Navision, very easy to use and understand. Support is very good and fast.

★★★★★

Unlocking insights, one download at a time.

Fast and easy to use, super-fast and friendly customer support, recommended for anyone looking to extract more information from their data
